

Why Biomousse Flora™?

Quatro formula of Lactic Acid, Tea Tree Oil, Aloe Vera Extract,
Pro Vitamin B3 and B5, specially developed
for women's intimate hygiene.

Lactic Acid:

Helps vaginal good bacteria to grow, maintains and restores vaginal pH balance,

Tea Tree Oil:

With its Anti Fungal, Anti Bacterial, and Anti Viral properties you
remain protected from vaginal infections.

Aloe Vera Extract:

Is well known for its soothing, moisturizing and healing
properties for relieving vaginal discomfort.

Pro Vitamin B3 and B5:

Provides extra moisturizing and nourishment to skin.

Ideal to use in:

- ✓ Daily intimate hygiene
- ✓ Vaginal unnatural discharge & bad odor
- ✓ Leukorrhea & Menstrual Period Discomfort
- ✓ Vaginal dryness among menopausal women
- ✓ Post hair removal itching & irritation

Use in 2 easy steps:

1. Gently Pump the bottle to take the right quantity of Biomousse Flora on wet palm
2. Apply the quantity on the wet area to make lather and wash away with water thoroughly

**For daily use*

Recommended daily wash is one time for intimate hygiene and two times in case of vaginal infection, irritation and discomfort.

Precautions:

- ✓ For external use only
- ✓ Do not swallow
- ✓ Avoid eye contact
- ✓ Keep out of reach of children

Storage:

- ✓ Store below 30°C
- ✓ Do not freeze

Why is personal hygiene important?

Hygiene is more than about being just clean It's about maintaining the right balance that helps prevent illness, gives you confidence self-esteem and makes your life healthier and happier.

When it comes to feminine hygiene:

Feminine hygiene, especially of private/intimate parts helps you lead a healthier and active life with fewer chances of infection or disease.

Knowing your intimate/private area:

Vagina needs special care to keep it hygienic and maintain a healthy pH level of 3.5 to 4.5 to encourage growth of good bacteria which fight against infection and disease.
